WORLD CITIES SUMMIT 2012

Urbanisation is occurring on an unprecedented scale. By 2050, it is estimated that 70% of people will live in cities. Cities also face challenges ranging from environmental management to social cohesion. Under the theme “Liveable and Sustainable Cities – Integrated Urban Solutions”, the World Cities Summit 2012 will explore how cities can build resilience and improve their quality of life and environment by adopting integrated solutions to increasingly complex challenges.

The World Cities Summit is the global platform for government leaders and industry experts to address liveable and sustainable city challenges, share integrated urban solutions and forge partnerships. Held in conjunction with the 5th Singapore International Water Week (SIWW) and the inaugural CleanEnviro Summit Singapore (CESS), the World Cities Summit 2012 will enable delegates to network with an even wider group of public and private sector players and discover synergies between urban planning, water and environmental solutions.

After the success of the first two Summits, World Cities Summit 2012 is expected to attract more than 3,000 government leaders, policy makers and industry experts from around the world.

Key highlights of the Summit are:

- Lee Kuan Yew World City Prize
- WCS Mayors Forum
- Plenary Sessions
- Flagship Urban Solution Tracks
- World Cities Summit Expo
- Urban Project Showcase
- Learning Journeys
